# LEADING THE LEAN TRANSFORMATION (EXECUTIVE ORIENTATION)

## WHAT IS LEADING THE LEAN TRANSFORMATION?

Leading the Lean Transformation is a 1.5-day intensive workshop, designed to introduce Executives and Key Leaders to the Culture, Tools, Pitfalls, and Expectations of building and sustaining a successful Lean Culture in your organization. From this workshop, you will have a high-level understanding of:

- What makes up a High-Performing Culture
- What Lean Leadership looks like
- The purpose of Lean in a business
- How to drive sustainable business performance using a codified business system

## WHY IMPLEMENT A LEAN BUSINESS SYSTEM?

### VALUE CREATION EQUATION:

**Improving Top-Line Performance:** Part of the business system is the development and implementation of strategy creation, business processes and strategic planning throughout your organization. Those foundational elements lead to a much more insightful way to investigate and grow top-line revenue.

**Meeting Customer's Expectations:** If you use a systematic approach, your organization will analyze, measure, compare and test all the possibilities of what your customers want and don't want.

**Consistent Results:** Whether we are considering safety, quality or getting the job done in a timely manner, a business system is designed to give you effective, efficient and repeatable results.

**Employee Engagement:** The goal of the system is to enable proper education and opportunities to all employees so they can complete their work more efficiently and effectively.

**Reduce Cost and Increase Profits:** It has been proven time and again that the implementation of a sound business system helps reduce costs
